

Post Operative Instructions for ARESTIN

- Postpone brushing for a 12-hour period, as well as avoid touching treated areas
- Postpone the use of interproximal cleaning devices for 10 days after administration of ARESTIN
- Some mild to moderate sensitivity is expected during the first week after ARESTIN is placed
- Avoid eating hard, crunchy, or sticky foods for 1 week
- Notify dentist promptly if pain, swelling, or other problems occur
